

Project Manager

We are looking for talented, forward-thinking and highly motivated project managers to work in dynamic and agile project environments across defence and non-defence projects and programmes.

Salary: Negotiable plus benefits, pension (7% contribution), 25 days holiday & life insurance

The Role: As a Project Manager you will be reporting vital project management information to clients, company directors and staff.

Responsibilities will include:

- Managing projects predominantly within the Defence and non-defence environments.
- Defining project objectives and overseeing quality control throughout its lifecycle.
- Delivering the end-to-end management of technical projects according to best practice principles by planning, executing, and closing projects according to strict deadlines and timescales.
- Delivering projects to time, cost budgets and quality.
- Providing effective stakeholder management, communications management, risk management, resource management, scheduling and monitoring and reporting on projects.
- Supporting project teams through review of plans and proposals ensuring value for money and ensuring delivery of plans is as required.
- Building new relationships and maintaining successful working relationships with our current customers.
- Maintaining working relationships with your project teams and third-party suppliers.
- Identifying and winning work in line with the company business objectives.
- Working organically in customer teams to deliver rapid turn-around projects, or to plan and deliver tasks.

About You

The successful candidate must be able to demonstrate the following essential and desirable attributes:

Essential

- A technically astute Project Manager who has demonstrable experience operating in a range of project environments of varying scales.
- Be able to adapt and provide flexibility in a dynamic and ever-changing environment.
- Possess demonstrable technical project management skills with a high level of accuracy and attention to detail.

- Previous experience managing multiple concurrent technical projects through the full lifecycle.
- APM or equivalent project management qualifications with substantial knowledge of agile project management
- Be organised and able to work under pressure with minimal supervision.
- Highly motivated professional who strives to deliver ahead of targets.
- Ability to utilise IT effectively as project management related software and systems.
- Be a trusted self-motivated individual who can perform when working as part of a team or when acting independently with support from colleagues.
- Be dependable, committed and have a genuine enthusiasm to contribute to the growth of a successful business.
- Be articulate with good presentation and communication skills.
- Have excellent communication skills, both verbal and written, with strong stakeholder management and influencing skills.
- Strong facilitation skills and adept at resolving conflict and negotiating with project stakeholders to ensure progress is maintained.

Desirable

- Be a member of an appropriate professional body (such as APM, PMI) and have a desire for further professional development.
- The ideal candidate will be educated to degree level and/or have equivalent relevant experience.
- Have practitioner experience in defence or non-defence environments.
